The one thing in life that I would like to acheve is become an inventor. But to achieve it, is a lot harder than you would think, you got to have the Schooling in certain departments of knowledg and have a wild imaganation, but to a certain extent shall it run you half to know the difrelence between real Things and imiagiomary Things, I have them all, except for the Schooling but IM working hard to get there, I will eventually get there but it takes time and knowedg I will soon learn about electronics.

That is the onn goal I have in life because if you put your mind to one thing and stick to it you will more likly acheve it, thats why I say, "Stick with it till it's over!"
