The interesting insect

Have you ever found a huge insect. Three months ago, me and my friend found one.

One day I went to my friends house. we went back to his pond and went to the top of his fort. Then we found what looked looked like a rubber caterpillar It was 2in wide and 2½ in long.

We thought it wasn't real untill it move a little. we didn't know what it was. So we went to ask his dad

When we found him he didn't know ether so we

asked his mom. She was scared
of it so we never found out
what it was
That bug was so cool.
I hope we find another one
like that.

An experience I had with a bug was the time I held my cousin's tarantula! It was hairy and creepy! I am NOT a bug person! It was climbing all over my body!

Next, it decided to go down my shirt! It crawled all down my shirt and headed back up to my face! I was as scared as a marshmallow about to be roasted! I ran upstairs as fast as I could and while I was running, it fell out of my shirt. But unfortunatly, I did not know about that and I started dancing around like a freak. Everybody started laughing at me. I spent the night at my cousins that night.

Like they say, time flies when your having "fun", and soon enough it was time to go to bed. Usually in bed I am snug as a bug in a rug, But I was afraid of one getting me instead. In the morning I woke up and my cousin said

his tarantula got out of it's cage and he could not find it! That's when I had to leave. The last thing I needed I needed was for a creepy, crawly thing to be wondering around the house.
