	Notes: Strengths: Rich content, rich visuals, multiple assessment/question and answer pieces. Supportive digital pieces for teachers and students, organized to be very user-friendly. Supports standards very well overall. Weaknesses: Reading is slightly over Kindergarten age. Will need teacher to do most reading. No evidence for standard 2.1.6 (Idaho map). Other: Standard 2.1.6 asked for Idaho map information. Addressed on line but not in text so marked NA.						
	Key Features: McGraw-Hill Networks, which encompasses Living Learning and Working Together, is a multiple award winning program. It is also a fully integrated print and digital program. The K-5 Networks program is a skill/process-based program that is based on understanding the concepts surrounding four domains of elementary social studies education, as identified in the C3 Framework: civics, economics, geography, and history. This is in alignment with the second major strand of the C3 Framework. The program print product is an interactive work text which calls for collaboration and engages the student to gather and evaluate data. UbD - The program focuses on teaching for understanding through instruction and assessment based on essential questions. It was created with the Understanding by Design (UbD) curriculum model, which fundamentally aligns with the first C3 Framework strand. Jay McTighe is a contributing author. ELA - This program is also aligned to the ELA standards within the CCSS framework. It has built-in formative assessment tools and interactive games for monitoring comprehension.

<p>Notes:</p> <p>Strengths: Texts are colorful and have specific examples of concepts being taught. Each unit has a revisit and check comprehension. Online resources and teacher manual is easy to follow with multiple interactive resources i.e. whiteboard lessons, videos in Learning 360, vocabulary match games and student text that can be preview or guided. A teacher is able to see lessons in sections and resources that are quickly linked for teacher use. Teacher manual provides specific questioning strategies and emphasized reading skills.</p> <p>Weaknesses: Student text Lexile level is above grade level. There are many words on each page. Even though each page layout is meant to be engaging but it is confusing. Foldables are intended to teach meaning and examples for students to draw a meaningful picture or make a choice so they have a personal connection to the word, however following directions and cutting would be confusing.</p> <p>Key Features:</p> <p>McGraw-Hill Networks: A Social Studies Learning System, which encompasses Our Community and Beyond, is a multiple award winning program. It is also a fully integrated print and digital program. Networks programs are built using the principles of Understanding by Design—an approach to backward design developed by Jay McTigh and Grant Wiggins. Each chapter planner in the Teacher Edition sets out the Enduring Understanding that will be achieved with mastery of the chapter content. Teachers are also provided with a comprehensive list of objectives, entitled “Students Will Know” and a list of skills entitled “Students Will Be Able To” for the chapter. To reach the Enduring Understanding, each chapter in the student edition begins with one or more Essential Questions. Each lesson is broken into a series of topics. Each topic includes a Guiding Question. As students master the content and are able to answer the Guiding Questions, their ability to respond and reflect on the Essential Questions increases. As students achieve the ability to answer the Essential Questions, they achieve the Enduring Understanding. The lesson reviews and the chapter assessments are aligned with the above objectives. Each lesson review includes questions that ask students to answer the guiding question. Each chapter assessment includes an activity that explores the essential question and in the Teacher’s Edition, teachers are provided with activities to wrap-up the chapter, including a review of the chapter’s Enduring Understanding.</p>

<p>Notes: Strengths: Text is visually appealing and format addresses various learning styles. The text sizing is appropriate. Lots of digital resources available with every unit. Writing activities are throughout the text. Students can write directly in the text and foldables are provided throughout. Weaknesses: Online resources are difficult to navigate and find. Most of the resources for this program are digital. Some of the standards are not covered or only partially covered. Leans heavily on three-four leveled readers for multiple standards.</p>

There were a lot of pictures to correspond directly to the text. It is consumable which means it doesn't take up a lot of classroom space and is constantly being updated. The online version matches the consumable exactly. The teacher's manual provides many options for the teacher. It could be taught once a week or on a daily basis. It would be easy to leave for a substitute to use. There was a list of books that corresponded to the curriculum. The teacher's manuals are comprehensive, but small. There were many technology links to more information, art projects, etc. Weaknesses: The fact it is consumable it would be difficult to use after the adoption time period.</p>
