

“It is easy to take something for granted when it is always there. In places rich with clean water resources there are watered lawns, clean cars, and long showers. Comprehending the global need for water is difficult- the tap turns; the water comes out. It is unimaginable to even think of walking great distances every day to throw a bucket into a swamp and call what comes out drinking water. More than a billion people in the world are currently in need of clean drinking water.”

NEED, The Humanitarian Magazine, Issue 3, 2007.
