## End of Unit Project Checklist

You have learned about cultural differences of the North and the South, differences over slavery, and the Civil War. You read books and articles to give you different perspectives of each point of view, and you have created a notebook to keep notes and information in. Now you will complete a project to celebrate your learning and show what you know. Some of this project will be done with a partner, and some will be done on your own. You will be graded individually. The steps to complete this project are listed below, and you will receive 10 points for completing each step. As you complete each step, you can check it off.

- Step 1: Choose a project, partner, and point of view.
- Step 2: Gather Information about my assigned topic. Gather three points of information about each topic we discussed during class. Remember to use the sources available in class.
- Step 3: Build a Timeline (This is to be done with my partner, but we each need your own timeline.)
- Step 4: Make a plan for my project. Design my quilt, write a script, or plan out my letters. This should be done collaboratively with my partner, but we each need to plan our own part of our project.
- Step 5: Create my project
  - Clearly represent the three parts of the Civil War from my assigned point of view. Show similarities and differences between the Confederates and the Yankees.
  - Include a timeline displayed in a creative and attractive way.
- Step 6: Complete a short answer assessment on your own.
- Step 7: Prepare to present your project. Create and memorize a script.
- Step 8: Present your project!
