

Genetic Engineering Vocab

Targeted Vocabulary: engineer, manipulate, GMO, CRISPR, inherited, trait

See it, Say it, Show it, Store it: Look at the written vocabulary word, then we will say it slowly together, then you will write the word and a definition in your own words.

1.

2.

3.

4.

5.

6.

Concept Map: Create a concept map to show how the 6 vocabulary words are related to each other.

Three Way Tie: Split the vocab words into two groups of three words. Arrange the words into a triangle shape with lines between the words. On the lines, explain the relationships

between the connected words.

Three's a Crowd: Students decide which word in a group of three doesn't belong and then explain why.

Engineer, Manipulate, Inherited

GMO, CRISPR, Trait
