

HOT SEAT

Your poster is in the Hot Seat (no matter how rough of an idea it is!)

Red dice → White dice v	1	2	3	4	5	6
1	Is your system open or closed? How can you tell?	From your research, who is making decisions that impact this system?	What are the ecosystem services that are important to consider in this system?	How is technology playing a role in <i>solving</i> this system problem?	Think closely, who's jobs are in play in this system?	Is there an innovative solution or possibility that is being researched and developed?
2	What are the inputs of your system? Are they clearly labelled?	How does your research relate to human population growth?	Are there any negative externalities being played out in this inquiry?	From your research, how are consumers responsible for this system's change?	Are there any <i>negative</i> feedback loops to understand or in play in your system?	From your research, who is profiting from this system or this issue?
3	Is there an innovative solution or possibility that is being researched or developed?	How is technology playing a role and <i>creating</i> this system problem?	What are the waste reduction opportunities presented here?	Is your system open or closed? How can you tell?	When you look at your poster - can you clearly state the purpose of your inquiry? Is it on the poster?	What are the ecosystem services that are important to consider in this system?
4	When you look at your poster - can you clearly state the purpose of your inquiry? Is it on the poster?	Are there any positive feedback loops to understand in your system?	When you look at your poster, who's voice is missing from your research?	What UN Sustainable Development goals does your research relate to?	How does your research relate to human population growth?	Are there any negative externalities being played out in this inquiry?
5	From your research who's jobs are in play in this system?	How does this new research relate to what you know about historic change?	What are the inputs of your system? Are they clearly labelled?	Are there any <i>positive</i> feedback loops to understand or in play in your system?	What is our economic system contributing to this issue?	What social justice issues are there to highlight in your poster?
6	What social justice issues are there to highlight on your poster?	What were your databases? Who did the research that you used?	Are there any positive feedback loops to highlight on your poster?	From your research, how is this issue connected to consumers and our economy?	From your research, who's jobs are in play when thinking through this issue?	What are the negative externalities being played out in this inquiry?
