School Day Report

School Day Report summarizes the performance of your students who took the SAT® School Day academic assessment during SAT School Day primary administration.

This report includes results for test-takers who have valid composite scores. Make up test-takers are excluded from this report.

You can use this report to:

- interpret scores of individual students within the broader context of score aggregated across groups of students
- study changes over time
- use with SAT Skills Insight™. SAT Skills Insight is a free, online tool that categorizes the types of skills students need to develop based on their SAT scores. The tool is available online at http://sat.collegeboard.org/SAT/public/pdf/SkillsInsight_WEB.pdf

The College Board's commitment to the Common Core State Standards is strong, and the major shifts the Standards require are already evident in the College Board's College Readiness Pathway assessments — ReditStep™, PSAT/NMSQT® and SAT®:

- The College Board's research informed the drafting of the Standards, and our experts helped guide the Standards development process.
- The Pathway assessments emphasize attention to both literary and informational texts and draw upon nonfiction passages from the social sciences, natural sciences and the arts.
- Reading passages within the Pathway assessments require students to grapple with important academic vocabulary.
- The SAT has made writing a focused requirement, which is deeply supported by the Standards.
- In math, the key content measured by the Pathway assessments is consistent with the Common Core.
- The Pathway math assessments measure both procedural skill and fluency and application skills, as required by the Common Core.

The aim of the College Board is to become the national leader in assessment that is deeply aligned to the Common Core. Recent alignment studies confirm that the College Board's College Readiness Pathway assessments are equally or more aligned to the Common Core than any other large-scale assessment available today. Looking ahead and in support of the Common Core, the College Board is committed to investing in deeper alignment to better reflect the intent of the Standards. Any other existing assessments offered by other organizations would need to undergo major redesigns to achieve this same level of deep alignment with the Common Core.

The SAT® Program

The SAT (formerly known as the SAT I: Reasoning Test) assesses student reasoning based on knowledge and skills developed by the students in their course work.

About the College Board

The College Board is a mission-driven not-for-profit organization that connects students to college success and opportunity. Founded in 1900, the College Board was created to expand access to higher education. Today, the membership association is made up of over 6,000 of the world's leading educational institutions and is dedicated to promoting excellence and equity in education. Each year, the College Board helps more than seven million students prepare for a successful transition to college through programs and services in college readiness and college success — including the SAT® and the Advanced Placement Program®. The organization also serves the education community through research and advocacy on behalf of students, educators and schools. For further information, visit www.collegeboard.org.
