### ***To qualify for a reportable IRI score:***

Use the appropriate grade level IRI test booklet provided by the State Department of Education, and administer the assessment according to the IRI administration and scoring rules, using the presentation/response accommodation(s) appropriate for the student. Include the students score in the IRI data entry application or ISEE test file submission. Additional time is not an allowable accommodation and results in a non-reportable IRI score.

### ***Presentation/Response Accommodations***

#### ***Letter Naming Fluency***

***Students who are DHH:*** The student will sign the letter to the proctor as the proctor points to the letter. **OR** The proctor signs the letter to the student and the student points to the letter.

***Students who are NV:*** The proctor says the name of the letters in each row in random order, and the student will point to the correct letter.

#### ***Letter Sound Fluency***

***Students who are DHH:*** The proctor may sign the letter and the student may point to the letter.

***Students who are NV:*** The proctor says the sounds of the letters in each row randomly and the student may point to the correct letter or the student can sign the name of the letter.

#### ***Reading Curriculum Based Measure (CBM)***

***Students who are DHH:*** The student will sign the passage to the proctor within the appropriate time administration.

A MAZE Subtest at the students' grade level administered with the appropriate time limit may be used for CBM measure.
