Idaho 21st CCLC Risk Assessment

The SDE evaluates each subgrantee's risk of noncompliance with Federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate monitoring (2 C.F.R. §200.331(b)). Effective risk assessments allow the SDE to identify specific areas of non-compliance to provide: (1) training and technical assistance on program-related matters; (2) on-site reviews; and (3) agreed-upon audit procedures (§200.331(e)). In order to better assist subgrantees, the SDE will use three tiers for risk assessment: low risk, moderate risk and high risk.

Subgrantees are not required to fill out this assessment themselves. This template is provided as a reference for how risk is assessed by the SDE.

Performance and Compliance	Criteria	Points

The SDE will conduct a risk assessment for every subgrantee at the end of each program year. Subgrantees classified as low risk will be notified of their risk status but will require no further action. Subgrantees classified as moderate risk may be subject to additional restrictions. The SDE may classify a subgrantee as high risk due to non-compliance, poor performance or years since the program was monitored. As a result of this classification, special conditions and restrictions may be required of the subgrantee (2 C.F.R. §§ 200.205 and 200.207). Restrictions may include more detailed reporting, program changes or additional monitoring. The SDE may monitor any grantee regardless of risk level.
