GRADES 6-8

Cengage Learning

World Cultures & Geography Eastern Edition

- **Grades 6-8**

- **Strengths:** This book balances text, images, and stories very well. On every page there is informational text and along with that text students will find either a graph, map, or some sort of image that helps to support the text. Throughout the book the student will also discover articles where they are invited to not only learn about modern day problems but also challenged to find solutions. Page 148 gives a great example of this where students are informed of the problem facing sea turtles and are then later invited to find a solution. This text contains colorful maps of the western hemisphere. These maps include physical, political, economic, population and many other forms of maps and graphs. The book along with the pictures that are contained in it are bright and capture the attention. The book is well organized with units, chapters, and sections. At the end of each section there is an ongoing assessment to help students recall what they have previously learned and then at the end of each chapter there is a review and assessment. These assessments are scaffolded very well and sectioned off on different parts so that if the teacher would like to assess just one part they are able to. There are also graphs and maps students are asked to analyze. One of the best tools for the teacher is that the teacher's edition is not one book but about 5 smaller books. Each book is 1 unit so as to make finding worksheets, guided projects, and sections of the reading easier.

- **Grades 6-8**
 - **Strengths:** Structure of text and chapter layout is intuitive. All major themes are laid out in the first three chapters and then practiced and retaught throughout the following 10 chapters. It is visually appealing: bright pictures, graphs, charts. All levels and styles of learning are recognized and supported. The Teacher’s Edition provides ample resources and suggestions to enhance the classroom environment.
 - **Weaknesses:** Standards: (6-9.GWH.5.1.2 -6-9.GWH.5.1.3) are not covered. The transmission of culture including language and literature arts were vague at best. The term, Ethnocentrism, is not defined in the book nor is it covered while discussing cultures or how it leads to misunderstandings.

Pearson Prentice Hall

myWorld Geography Survey (Eastern and Western Hemisphere)

- **Grades 6-8**

- **Strengths:** The My World Geography textbook is targeted for middle school students, 6-8th grade, and all areas of the Western Hemisphere are represented within the text. The My Story sections profiles each region represented in the Western Hemisphere by using a personal interest story of a student in the age range of the targeted reader ex. pg. 255: Daniella's Coffee Run. The student journal can be used to enhance learning and there is an online version of the text to expand learning through technology. The textbook could stand alone without student journals because each chapter has analysis sections within the 21st Century Learning sections, ex. pg. 246: Young and Unemployed in Middle America. Charts, maps, and compare/contrast sections are used throughout the text, ex. pg. 247, 248, 276. Each chapter has an assessment section, with some high level and some basic questions. Students are directed to use the online version for 21st Century Learning in problem solving, ex. Analyze Media Content, pg. 277. This textbook and materials are visually appealing and has a consistent sequence of activities throughout the book. The personal stories (My Story) could be accessed online or read in hard copy format, ex. "Shaimaa's Neighborhood." connected to the student journal, and students answer the question: "What does Shaimaa's story tell you about life in North Africa?" Each chapter has maps and charts for comparison purposes, ex. pg. 552 with essential question: How much does geography shape a country? Assessments have both higher and basic level questions. The DBQ's are basic multiple choice questions, but they are effective to generate a discussion, ex. pg. 733 - documents on South Asia, comparing country's arable land. The teacher guide (Pro Guides) are divided up in multiple booklets and has Differentiated options for higher level students as well as those with special needs, ex. T28 - subject Patterns of Government in Arabia -objectives are stated, and suggestions on how to connect the material to relevance for today, how to adjust for special needs, how to challenge high level thinking, and how to differentiate for ELL students. The student journal has many writing prompts and writing graphic organizers, ex. T36 -T37, Writing to the prompt: What are the challenges of diversity? The journal pages give guidance and then practice in setting up a piece of historical writing. The map and illustrations are specific to the regions represented and are colorful and easy to read. The textbook is specific to all regions within the Eastern Hemisphere and covers the history of the region, relationship to other countries, political systems and relationship to the United States. It is more than a geography book

as it represents the cultural aspects of the various places within the Eastern Hemisphere.

- **Weaknesses:** This text has an extensive coverage of the Western Hemisphere, so weaknesses are few. The text doesn't just cover the geography of a region, it covers the historical background and present day problems of targeted regions as well. If a geography course was a semester long, much of the offered text would need to be set aside to fit curriculum time frame. This text book covers the regions of the Eastern Hemisphere extensively, with both cultural and geographical aspects and goes into detail about the history of the regions. It may be difficult to fit the curriculum scope and sequence into the time frame needed with using this text. The Pro Guides have many suggested activities, but because there are multiple mini sections, searching for the correct guide may hinder planning lessons.
