Attention Parents

As you know, your child has been learning about why they should care about their teeth. Today your child is bringing home a poster detailing a few of the things they’ve learned. On the back of the poster you’ll find a form that she or he will be using for the next five days to log tooth care habits. You’ll also find stickers attached that should be placed on the log as those habits are accomplished. Please help your child find a safe and visible place to display this poster/log and safe place to keep the stickers. After five days, please return the poster/log to school. This last step will be so important. Thank you!

1. Display
2. Log
3. Return to school after 5 days
