We have been learning a lot about water and the challenges people face to accessing clean water. Sometimes kids feel like they can’t make a difference in big problems. Your job is to create a public service announcement video or poster to tell other kids what they can do to help solve the problem: What can be done to provide clean water to everyone? Your PSA must address one of the challenges we have been studying: demand, pollution, or access, and give your opinion about one thing a kid could do to help with this problem. Your PSA must include one picture.

Your PSA will be sent to the Boise Watershed to help them teach other kids about water challenges.
