Instructions for Shelter Construction #1

You need to build the strongest shelter you can possibly construct using only the materials you have been given in this bag. Your shelter must be at least 10 inches tall and must protect your little person. You have fifteen minutes to build. At the end of your construction time, the strength of your shelter will be put to the test. In order to build this shelter, you need to collaborate (work together) with your team members. However, there are some ground rules you MUST follow for the collaboration at your table:

1. You must select one spokesperson for your group.
2. The spokesperson is the only person at your table who can talk.
3. The other members of the group can only use hand gestures to communicate. No writing.
4. If anyone else at your table decides to talk or write during the fifteen minutes, your team will be disqualified.
5. Don’t question the actions of other tables, just focus on your own table and your own rules.

Instructions for Shelter Construction #2

You need to build the strongest shelter you can possibly construct using only the materials you have been given in this bag. Your shelter must be at least 10 inches tall and must protect your little person. You have fifteen minutes to build. At the end of your construction time, the strength of your shelter will be put to the test. In order to build this shelter, you need to collaborate (work together) with your team members. However, there are some ground rules you MUST follow for the collaboration at your table:

1. No one at your table can talk.
2. You may only communicate through writing.
3. If anyone at your table decides to talk during the fifteen minutes, your team will be disqualified.
4. Don’t question the actions of other tables, just focus on your own table and your own rules.
5. Have fun. Build strong.

Instructions for Shelter Construction #3

You need to build the strongest shelter you can possibly construct using only the materials you have been given in this bag. Your shelter must be at least 10 inches tall and must protect your little person. You have fifteen minutes to build. At the end of your construction time, the strength of your shelter will be put to the test. In order to build this shelter, you need to collaborate (work together) with your team members. However, there are some ground rules you MUST follow for the collaboration at your table:

1. You need to choose two table captains.
2. The table captains are the only people at your table who are allowed to talk.
3. The rest of your team can communicate through hand gestures or writing.
4. If anyone other than the captains at your table decides to talk during the fifteen minutes, your team will be disqualified.
5. Don’t question the actions of other tables, just focus on your own table and your own rules.

Instructions for Shelter Construction #4

You need to build the strongest shelter you can possibly construct using only the materials you have been given in this bag. Your shelter must be at least 10 inches tall and must protect your little person. You have fifteen minutes to build. At the end of your construction time, the strength of your shelter will be put to the test. In order to build this shelter, you need to collaborate (work together) with your team members. However, there are some ground rules you MUST follow for the collaboration at your table:

1. You must select one spokesperson for your group.
2. The spokesperson is the only person at your table who can talk.
3. The other members of the group can only use hand gestures to communicate. No writing.
4. If anyone else at your table decides to talk during the fifteen minutes, your team will be disqualified.
5. Don’t question the actions of other tables, just focus on your own table and your own rules.

Instructions for Shelter Construction #5

You need to build the strongest shelter you can possibly construct using only the materials you have been given in this bag. Your shelter must be at least 10 inches tall and must protect your little person. You have fifteen minutes to build. At the end of your construction time, the strength of your shelter will be put to the test. In order to build this shelter, you need to collaborate (work together) with your team members. However, there are some ground rules you MUST follow for the collaboration at your table:

1. Everyone at your table is allowed to talk.
2. You need to select a team captain. (This captain will remain captain for the entire fifteen minutes.)
3. Only the team captain is allowed to touch the building materials.
4. If anyone besides the captain touches the materials during the fifteen minutes, your team will be disqualified.
5. Don’t question the actions of other tables, just focus on your own table and your own rules.
Instructions for Shelter Construction #6

You need to build the strongest shelter you can possibly construct using only the materials you have been given in this bag. Your shelter must be at least 10 inches tall and must protect your little person. You have fifteen minutes to build. At the end of your construction time, the strength of your shelter will be put to the test. In order to build this shelter, you need to collaborate (work together) with your team members. However, there are some ground rules you MUST follow for the collaboration at your table:

1. Everyone at your table is allowed to talk.
2. Everyone at your table is only allowed to use their left hands during the construction process.
3. If anyone at your table decides to use their right hand, your team will be disqualified.
4. Don’t question the actions of other tables, just focus on your own table and your own rules.
5. Have fun. Build strong.
