

# JOIN THE MOVEMENT IDAHO MATH TRANSITIONS

The Idaho Math Transitions project supports Idaho high schools in offering math courses aligned with college and career interests with the goal of advancing opportunities in mathematics for students. These professional development (PD) offerings during the 2025-2026 school year will support teachers and leaders in this work.

## VIRTUAL MEETUPS 2026

These meetups focus on solutions to a variety of problems of practice high schools are experiencing as they implement the Idaho Math Transitions framework. The meetups are monthly on the third Monday of each month, October through May. January/February will have one meetup on February with one meeting for January and February on February 9 to accommodate for the Monday holidays those months.

*One PD credit available.*

## PD COURSES SPRING 2026

These hybrid courses model engaging mathematics instruction aligned to the Idaho Math Instructional Framework and educate high school teachers on the Idaho Content Standards for Mathematics appropriate for their grade levels. These courses are ideal for high school mathematics teachers new to the profession.

Course 1 - Foundational Standards: Modeling

Course 2 - Foundational Standards: Number and Quantity/Statistics

*Course format includes virtual sessions in April and May and one regional in-person all day session in June. One PD credit available.*

## IDAHO MATH BADGING

An intensive PD experience for a team of teachers, badging is a unique, student-friendly approach to organizing high school mathematics content. Math badges provide a way to certify learning in a unit that is larger than a standard, but smaller than a course credit. The Badging Initiative supports shifts in instruction and assessment practices through problem-based lessons, project-based learning and portfolio assessment. Cohort 3 begins in Fall '26. If your school is interested in joining Cohort 3, please email [veronicablackham@isu.edu](mailto:veronicablackham@isu.edu)
