

TEACHING MATHEMATICAL THINKING (TMT)

Statewide Class Schedule 2022-2023 School Year

This course provides an opportunity to study fundamental mathematical theory underlying the content area of number and operation and student reasoning of number and operation topics within a framework of a student-centered, problem-based classroom. Topics will include number systems, ways of representing numbers, and meanings of operations.

Content is similar across all three classes (K-2, 3-5, 6-9), with grade-level topics receiving additional coverage. The K-2 course centers around early numbers, the 3-5 class delves deeply into fractions, and the 6-9 course dedicates additional time to proportional reasoning and the transition to topics of algebra and function.

TMT courses are offered in a variety of formats in each region of the state to meet the needs of our growing state population. Class participants may sign up for a class in any region. Registration is limited to 35 participants for each course.

This class schedule is organized by region. See <https://www.sde.idaho.gov/academic/math> for a map of which districts are in each region and a Frequently Asked Questions Document.
