May IRI Administration Update

• SBOE has voted to ask Governor Little to waive the administration of the IRI for accountability purposes.

• This would allow the assessment to be administered as a means for teachers and families to see how students are progressing, but scores would not be reported.
• On March 30th Istation activated their home-school curriculum for all K-5 Idaho students.

• For information access this one-sheet that explains more about Istation's school-to-home solution

• You can also visit this page to learn about Istation's response to COVID-19 and how educators can get started enabling home access today.
What Schools Need to Know

• Teachers have the option to post lessons for individual students to complete when logging into Istation.
• Enabling parent portal will allow parents access to resources and reports.
What Parents Need to Know

• Student lessons do not have an automatic stopping place. Students will need to be prompted/reminded to log out after a specific time frame or when a concept lesson ends (e.g. the lesson about mass changes to a lesson about space)

• Parents can log into istation.com with their students information to see reports and access helpful resources (this is parent portal)
The IRI work group developing guidance for accessing students who are blind/visually impaired met last week.

- Appendix F in the IRI Test Administration Manual has been drafted to be released in fall 2020
  - Detailed procedures for administration
  - Test administrator training requirements
  - Specific accommodations for BVI population
