ASSESSMENT & ACCOUNTABILITY QUESTIONS & ANSWERS

Do we need to pre-identify those 12th graders who need to take the SAT and just upload those students with our junior bulk upload?

Yes, you can do that if you already have identified students who need to take the test. It is one of the easier ways to go about that, but they could also register the day of if needed.

Can students register for the essay prior to the district completing the bulk upload in January?

No, they cannot. That is a good question but they cannot. My suggestion is just to ensure they have a College Board account. But the window is dictated by the College Board operations.

Is there a deadline for testing late enrolled students?

The student must be enrolled and also identified as an eligible English Learner on or before Friday, March 1. If the student enrolls on that date but has not gone through and completed the identification process you would not be expected to assess him/her. You should not assess a student until he/she has actually been identified as an English Learner. Finally, as a brief reminder, you do have the 30 days to administer the screener piece for the identification of the student as an EL.
