Optional Winter IRI Administration

• Allows for implementation of testing protocols and accommodations for students

• Measures mid-year progress toward end of year goals

• Determine skill level and percentile rank growth
IRI Growth Data

• Rate of Improvement
  • Compares a student's past assessment performance to that of their peers across multiple months
  • A student must be assessed in three distinct months before ROI can be calculated

• Skill Growth
  • Growth can be tracked at the classroom level and at the student level for overall Reading and within each subtest.
  • Campus and district admin can also track growth by grade level.
New Rostering Requirement

• New requirement to include date of birth in Istation when rostering students.
  • New students in 2019-2020 school year
  • Fall rostering in 2020-2021

• If the date of birth is not included when entering the student, you will receive an error message and be prompted to enter the DOB.

• The assessment and accountability team uses the student EDUID to match students assessment records, but in cases of duplicate EDUID’s or invalid EDUID’s, we rely on other information like DOB to match student assessment records to ISEE data.

- Google no longer has support for these types of apps

2 Options for districts using Chromebook for IRI administration
