

<p>Claim #4: Students can engage in research/inquiry to investigate topics, and to analyze, integrate, and present information.</p>	
<p>Target 4. USE EVIDENCE: Cite evidence to support opinions, ideas, or analyses.</p>	
<p>Clarifications</p>	<p>Clarifications for the Item Writer:</p> <ul style="list-style-type: none"> • Target 2 will focus on choosing text and visual elements that support a research central idea, key detail, and/or given purpose as well as the integration of notes into a central idea or key detail category. Target 3 will focus on analyzing sources in order to locate additional information, such as relevant sources of information and relevant information from visual elements that will enhance an existing piece of student writing. Target 4 will focus on using/selecting evidence to support an opinion, idea or analysis. • All stimuli are discrete and written by the item writer. The stimuli should be based in fact with acknowledgements in the metadata. The stimuli must also sound and look like authentic research.
<p>Standards</p>	<p>RI-1 <u>Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text.</u></p> <p>RI-6 <u>Analyze multiple accounts of the same event or topic, noting important similarities and differences in the point of view they represent.</u></p> <p>RI-7 <u>Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently.</u></p> <p>RI-9 <u>Integrate information from several texts on the same topic in order to write or speak about the subject knowledgeably.</u></p> <p>W-1b <u>Provide logically ordered reasons that are supported by facts and details.</u></p> <p>W-8 <u>Recall relevant information from experiences or gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources.</u></p> <p>W-9 <u>Draw evidence from literary or informational texts to support analysis, reflection, and research.</u></p>
<p>Depth of Knowledge</p>	<p>CAT items will be DOK 2.</p>
<p>Stimuli</p>	<p>Claim 4 stimuli are discrete and written by the item writer. Primary source material may be from public domain documents. Most Claim 4 stimuli are excerpts from research sources. Examples of Claim 4 stimuli in grade 5 may include, but are not limited to, journal articles, informational books/websites, paired excerpts on the same topic, or multiple account sources. If the stimulus contains a visual with data expressed quantitatively, the stimulus should be clearly providing information for research and not assessing the student’s ability to discern quantitative data, as in a math item. Although the item writer is creating the research source and visual stimuli, the information should be based in fact and contain acknowledgments in the metadata. If a study is mentioned in the stimulus, the study</p>

	<p>should be real with correct acknowledgement to the author. Titles and brief pieces of author information should be included along with the source label if the information is needed for the task. For primary sources, a brief explanation of the type of source and author may need to be provided to indicate the type of primary source. (e.g., Source 1: Diary Entry by _____, a person who saw the event.) Be consistent within the item. If a title and author information is included for one source, then all sources within the same item should include titles and author information. The stimulus should be one, two, or three short excerpts—not more than 150 words for the elementary grade band.</p>
Stimuli/Text Complexity	<p>Claim 4 stimuli should follow the guidelines in the stimulus specifications document; however, the complexity should be one grade level below the assessment level. The vocabulary used in the stimulus and the item should be at least one grade level below the assessment level. In some instances, content-specific vocabulary may be on or above grade level as long as the word is easily decodable and has sufficient, explicit context to support the meaning and to avoid any prior knowledge needed of the word.</p>
Accessibility Concerns	<p>Students will be required to read brief text stimuli and use a mouse. Students will be required to view/ interpret visual sources that are supported by textual sources. Students with physical impairments may need to use an adapted mouse or others a computer with eye scanning capabilities. Students who are visually impaired or blind may need enlarged or brailled text and descriptions of pictures and art. Students with reading disabilities may need to read the text to themselves, or use trackers, or maskers to follow along. Students with visual processing impairments may benefit from using a tracker or masker when reading. Other formats or supports may be necessary for students with other disabilities. The accommodations listed here are suggestions and could be altered depending on what accommodations will be allowable.</p>
Evidence Required	<p>1. The student will select evidence to support opinions, ideas, or analyses based on evidence collected and analyzed.</p>
Allowable Item Types	<ul style="list-style-type: none"> • Multiple Choice, single correct response • Multiple Choice, multiple correct response • Hot Text, Select Text

Task Models	
<p>Task Model 1 Item Type: Multiple Choice, Single Correct Response DOK Level 2</p>	<p>CAT Primary Standard Alignment: W-9</p> <p>CAT Secondary Standard Alignment: RI-7, RI-9, W-1b, W-8</p> <p>Stimulus: The stimuli will follow the Claim 4 stimulus specifications. The types of stimuli that are allowable for this model are listed below.</p> <p>Stimulus: G5.T4.A: Opinion Writing Lacking Evidence This stimulus should be a brief piece of student opinion writing. The student writing should contain one opinion statement that is not supported by reasons or evidence.</p> <p>Stimulus: G5.T4.B: Informational Text with Conjecture This stimulus should be a paragraph from an informational source in which the author includes conjecture, or an opinion that is lacking sufficient supporting evidence or is lacking complete information.</p> <p>Task Description: The test taker will select a piece of information/fact/note that supports a given opinion/conjecture. The item stem will pose a question asking the test taker to choose information that a student could use to support a given opinion/conjecture. The answer choices will present four options that could support the opinion/conjecture stated in the stimulus. The choices should come from an informational source. All of the choices are related to the same topic. To avoid clueing, the options should either contain no wording from the stem/stimulus/source or a balance of wording across the options. To avoid outliers, be sure that the answer choices are about the same length, staggered evenly, or that a balance of length is used (i.e., two short, two long). Order choices from shortest to longest. The correct answer choice will be a statement that clearly supports the opinion/conjecture provided in the stimulus. Distractors will reflect common student errors. Plausible distractors for this model might include: 1) a statement/fact/note that is related to the topic of the opinion/conjecture, but not directly related to the opinion and/or 2) another opinion/conjecture with a fact that supports it, but does not support the opinion/conjecture in the stimulus. Rationales should state the justification for why the plausible distractor is incorrect.</p> <p>Target Evidence Statement: The student will select evidence to support opinions, ideas, or analyses based on evidence collected and analyzed.</p>

	<p>Appropriate Stems:</p> <ul style="list-style-type: none"> <p>Lead-in: A student is writing a paper about <topic>. [He/she] wrote an opinion in the paper. Read the opinion and the directions that follow.</p> <p>Stimulus: G5.T4.A: Opinion Writing Lacking Evidence</p> <p>Stems:</p> <ul style="list-style-type: none"> The student took notes about <topic>. Which note supports the student’s opinion? The student took notes about <topic>. Which note best supports the student’s opinion? The student found a source about <topic>. Which sentence from the source supports the student’s opinion? The student found a source about <topic>. Which sentence from the source best supports the student’s opinion? <p>Lead-in: A student is writing a research report about <topic>. [He/she] found a source. Read Source 1 and the directions that follow.</p> <p>Stimulus: G5.T4.B: Informational Text with Conjecture</p> <p>Stems:</p> <ul style="list-style-type: none"> The student took notes about <topic>. Which note supports the author’s opinion in Source 1? The student took notes about <topic>. Which note best supports the author’s opinion in Source 1? The student found another source about <topic>. Which sentence from the source supports the author’s opinion in Source 1? The student found another source about <topic>. Which sentence from the source best supports the author’s opinion in Source 1? <p>Scoring Rules: Correct response: 1 point; Incorrect response: 0 points</p>
<p>Task Model 2 Item Type: Multiple Choice, Multiple Correct Response DOK Level 2</p>	<p>CAT Primary Standard Alignment: W-9</p> <p>CAT Secondary Standard Alignment: RI-7, RI-9, W-1b, W-8</p> <p>Stimulus: The stimuli will follow the Claim 4 stimulus specifications. The types of stimuli that are allowable for this model are listed below.</p> <p>Stimulus: G5.T4.A: Opinion Writing Lacking Evidence This stimulus should be a brief piece of student opinion writing. The student writing should contain one opinion statement that is not supported by reasons or evidence.</p> <p>Stimulus: G5.T4.B: Informational Text with Conjecture This stimulus should be a paragraph from an informational source in which the author includes conjecture, or an opinion that is lacking sufficient supporting evidence or is lacking complete information.</p>

Task Description:

The test taker will select pieces of information/facts/notes that support a given opinion/conjecture.

The **item stem** will pose a question asking the test taker to click on information that a student could use to support a given opinion/conjecture.

The **answer choices** will present six to eight options that could support the opinion/conjecture stated in the stimulus; however, regardless of the number of answer options, the correct responses must equal less than half of the total answer options. The choices should come from an informational source. All of the choices are related to the same topic. To avoid clueing, the options should either contain no wording from the stem/stimulus/source or a balance of wording across the options. To avoid outliers, be sure that the answer choices are about the same length, staggered evenly, or that a balance of length is used (i.e., three short, three long). Order choices from shortest to longest.

The **correct answer choices** will be statements that clearly support the opinion/conjecture provided in the stimulus. There must be at least two correct options.

Distractors will reflect common student errors. Plausible distractors for this model might include: 1) a statement/fact/note that is related to the topic of the opinion/conjecture, but not directly related to the opinion and/or 2) another opinion/conjecture with a fact that supports it, but does not support the opinion/conjecture in the stimulus.

Rationales should state the justification for why the plausible distractor is incorrect.

Target Evidence Statement:

The student will select evidence to support opinions, ideas, or analyses based on evidence collected and analyzed.

Appropriate Stems:

- **Lead-in:** A student is writing a paper about <topic>. [He/she] wrote an opinion in the paper. Read the opinion and the directions that follow.

Stimulus: G5.T4.A: Opinion Writing Lacking Evidence**Stems:**

- The student took notes about <topic>. Choose **two** notes that **best** support the student's opinion.
- The student found a source about <topic>. Choose **two** sentences from the source that **best** support the student's opinion.

- **Lead-in:** A student is writing a research report about <topic>. [He/she] found a source. Read Source 1 and the directions that follow.

Stimulus: G5.T4.B: Informational Text with Conjecture**Stems:**

- The student took notes about <topic>. Choose **two** notes that **best** support the author's opinion in Source 1.
- The student found another source about [topic]. Choose **two** sentences from the source that **best** support the author's

	<p>opinion in Source 1.</p> <p>Scoring Rules: Correct response: 1 point; Incorrect response: 0 points</p>
<p>Task Model 3 Item Type: Hot Text, Select Text DOK Level 2</p>	<p>CAT Primary Standard Alignment: W-9</p> <p>CAT Secondary Standard Alignment: RI-1, RI-7, RI-9, W-1b, W-8</p> <p>Stimulus: The stimuli will follow the Claim 4 stimulus specifications. The types of stimuli that are allowable for this model are listed below.</p> <p>Stimulus: G5.T4.C: No Stimulus</p> <p>Stimulus: G5.T4.B: Informational Text with Conjecture This stimulus should be a paragraph from an informational source in which the author includes conjecture, or an opinion that is lacking sufficient supporting evidence or is lacking complete information.</p> <p>Task Description: The test taker will select sentences in a source to support an opinion/conjecture. The item stem will ask the test taker to click on (a) sentence(s) that support(s) a given opinion/conjecture. The delimited text should be an informational paragraph from one or more source(s). Avoid using transitional sentences that might be selected. There should be six to eight pieces of text that are delimited; however, regardless of the number of answer options, the correct responses must equal less than half of the total answer options. The correct answer choice(s) should be (a) piece(s) of text that clearly support(s) the opinion/conjecture. If there are too many defensible options (check every possibility), do not use this item type; use multiple choice. Distractors are the delimited sentences/pieces of text that are not selected and should reflect common student errors. There should be at least four sentences/pieces of text that are plausible if the student does not have the skills to complete the target. Plausible distractors for this model might include: 1) a fact that is related to the topic of the opinion/conjecture, but does not directly relate to the opinion/conjecture and/or 2) an interesting fact that students may want to include in a report, but does not support the opinion/conjecture. Rationales should state the justification for why the plausible distractor is incorrect. Please provide rationales for all distractors.</p> <p>Target Evidence Statement: The student will select evidence to support opinions, ideas, or analyses based on evidence collected and analyzed.</p>

	<p>Appropriate Stems:</p> <ul style="list-style-type: none"> • Lead-in: none Stimulus: G5.T4.C: No Stimulus Stems: <ul style="list-style-type: none"> ○ A student is writing a paper about <topic>. The student wrote the following opinion: <opinion>. [He/she] found a source. Read the source. Click on [one/two/three] sentence(s) that [has/have] information to support the opinion. ○ A student is writing a paper about <topic>. The student wrote the following opinion in [his/her] paper: <opinion>. The student found two sources. Read both sources. Click on one sentence from each source that has information that the student can use to support the opinion. • Lead-in: A student is writing a research report about <topic>. [He/she] found a source. Read Source 1 and the directions that follow. Stimulus: G5.T4.B: Informational Text with Conjecture Stems: <ul style="list-style-type: none"> ○ The student found another source. Read Source 2. Click on [one/two/three] sentence(s) that support(s) the opinion in Source 1. ○ The student found two additional sources. Read Source 2 and Source 3. Click on one sentence from Source 2 and one sentence from Source 3 that supports the opinion in Source 1. <p>Rubric/ Scoring Rules: Correct response: 1 point; Incorrect response: 0 points</p>
<p>NEW Task Model 4 Item Type: Multiple Choice, Single Correct Response DOK Level 2</p>	<p>CAT Primary Standard Alignment: W-8</p> <p>CAT Secondary Standard Alignment: RI-1, RI-9, W-1b</p> <p>Stimulus: The stimuli will follow the Claim 4 stimulus specifications.
